Me Too High

Design by **Nurus D Lab**

Me Too High

A special purpose Me Too with footrest is a good fit for technical work environments such as welcome and consultation areas and airport control towers.

Me Too High **Fluid Motion**[®] features multi-adjustable arms, optional lumbar and neck support, mesh backrest and castor wheels for different surfaces.

Me Too has 25 degrees backrest tilt capacity, and it may be locked in 4 different positions. During the back tilt, the seat moves about 2.7/1, and Me Too offers a balanced protection of the distance between the lower back and sitting surface.

Prolonged seated working presents several problems for physical health; the neck, shoulders, arms and legs. Sitting may be inevitable; so is coming up with answers to minimize fatigue.

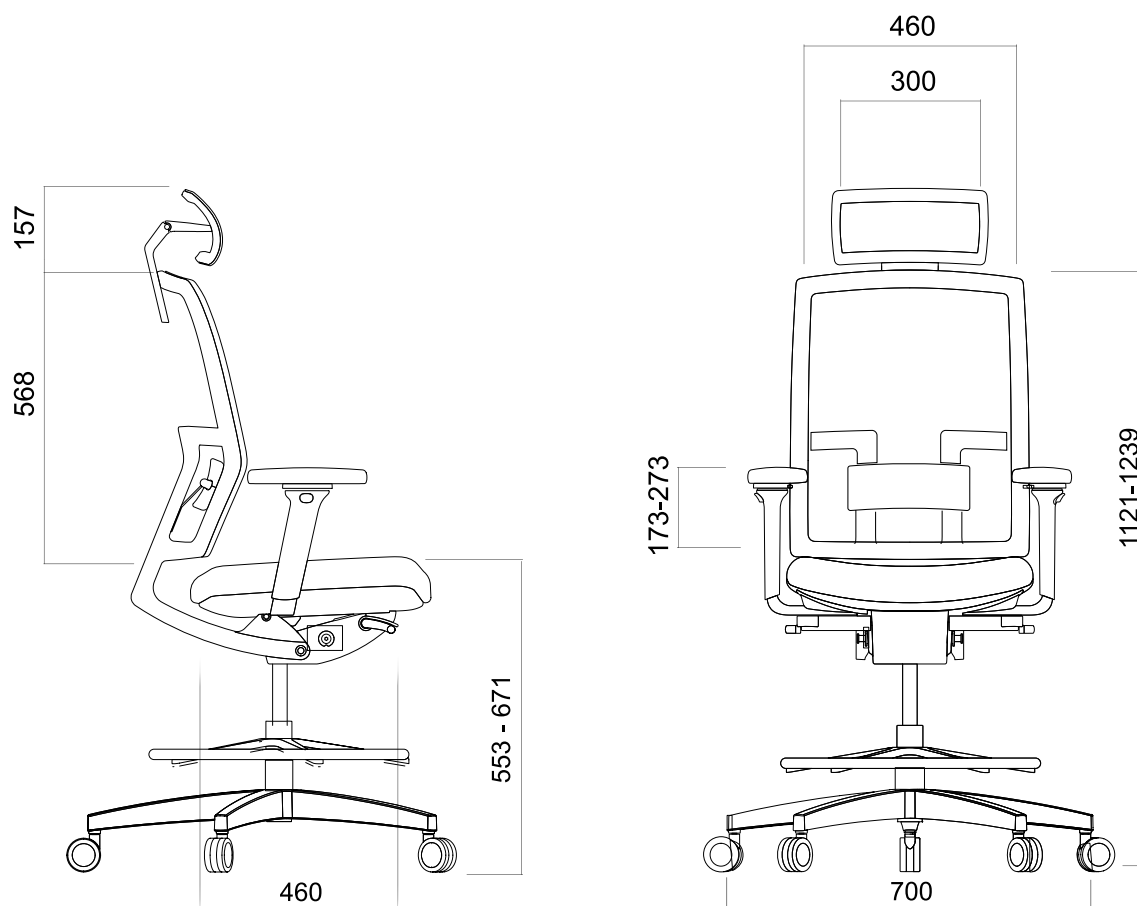

- Supports freedom of movement and promotes dynamic sitting.
- 70 cm base diameter to assure stability against tipping over.
- Castor wheel options for soft and hard floor use.
- Features two types of locking wheel mechanisms for increased safety: "Locked when loaded" and "locked when unloaded".

Design by Nurus D Lab

Always up-to-date with science and technology, Nurus D Lab designs products that are ahead of their time. Through human-centered observation, prototyping and in respect to trending needs and dreams, the team works diligently. Coming up with meaningful and reflective design solutions only marks the start of the process: From strategy to launch and support, D Lab manages it all. Each detail is attended and tested through at the advanced level.

DIMENSIONS (mm)

Dimensions defined in millimeters.

Materials

Frame comes with black color. There are PP or aluminum base options. Upholstery is available in different materials.*
