Trea Collection

Design by **Paul Brooks**

In ease, harmony and simplicity.

A wide range of options for use in all living spaces such as homes, offices or public places. Comfy, cozy and adaptable despite its simple looks.

Trea **Dyna-Support**[®] is response: It reacts to the weight of you, eliminating the need to make any special adjustments. It is a weight-activated mechanism with synchronous motion that helps keep your body in a healthy, natural position through average working hours. Allows 18 degrees of back tilt motion. Can be locked in an upright position. Perfect for touchdown areas and shared working environments.

Trea Fixed is comfortable use in shared workspaces; also homes, cafes, restaurants, lounges and waiting zones. Can be used with or without the armrests.

As a spring chair design or on 4 legs. With or without armrests and soft material cushioning. For meeting zones, homes, cafes and restaurants; waiting and dining areas.

- Structural flexibility with durable, elastic mesh backrest.
- A variety of personalization options.
- With wheeled or fixed 5-star swivel base options. (**Dyna-Support**[®] and Fixed)
- Optional armrests.
- Trea chairs are easily stackable. (Without armrests version.)

Trea **Dyna-Support**[®]

Backrest Tilt

Synchronously moving seat during the back tilt offers balanced protection of the distance between the lower back and sitting surface.

Trea **Dyna-Support**[®]'s backrest tilt offers 18 degrees of back tilt. It can be locked in in an upright position.

Armrest Height

Easily and individually adjust each armrest height to minimize the risk of discomfort. Ideally, the work surface should be at level with or a rest a little lower than your elbow. Adjusting armrests to your task in this way helps reduce the recurrence of repetitive strain injuries like tennis elbow or CTS (carpal tunnel syndrome).

Armrest Width

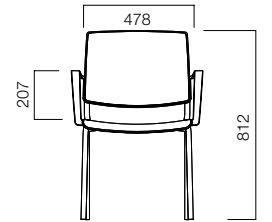

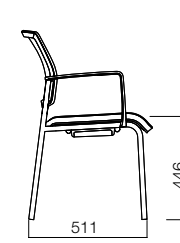

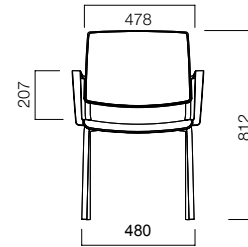

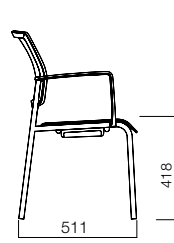

Minimize articular disturbances caused by long hours of work. Reduce accumulating fatigue in the shoulders and the neck by customizing the armrest width to your body and your task.
