Tools Collection at a Glance

Design by **Nurus D Lab**

Functional and efficient work spaces.

Tools collection has a rich product range, including panels, accessory strips and organizer accessories. Tools collection facilitates your business life by organizing work spaces and keeping everything in place.

This stunning art book provides a guide to 365 of the world's greatest artists and includes works from medieval times to the present day. Each artist is represented by a full-colour image of one of their most significant or interesting works and a stimulating and informative piece of text. As you turn the pages you will experience the incredible range of artistic variety, with the rich colours of a Renaissance masterpiece rubbing shoulders with a cool neo-Classical painting, or a serene Impressionist work nestling alongside a striking modern portrait. Among the great names you will find here are:

Botticelli, Degas, Dürer, Manet, Michelangelo,
Monet, Picasso, Rembrandt, Titian and Van Gogh.
