Pila

Height Adjustable Workstation

Design by **Nurus D Lab**

Pila Height Adjustable Workstation

Pila height adjustable workstations provide flexible and functional solutions for concentrated and individual tasks.

Pila creates healthier, happy and dynamic workplaces by height adjustable tables that encourage both seated and stand-up working sessions. This feature also helps minimize health problems caused by extended work sessions in the same position. With its carefully calculated panels, Pila also minimizes environmental impact and supports concentration while working, conducting interviews, or just thinking.

You can prefer Pila height adjustable workstations with 2 tables or with a table and a sofa.

Design by Nurus D Lab

Always up-to-date with science and technology, Nurus D-Lab designs products that are ahead of their time. Through human-centered observation, prototyping and in respect to trending needs and dreams, the team works diligently. Coming up with meaningful and reflective design solutions only marks the start of the process: From strategy to launch and support, D-Lab manages it all. Each detail is attended and tested through at the advanced level.
