Calma Collection

Design by **Nurus D Lab**

A functional solution for open-offices and shared spaces...

The nature of work has changed rapidly by comparison past decades. We do not use one or two person rooms or closed doors anymore. New technology enables people to collaborate and work from wherever they are from airports to coffee shops and hotels.

With changing of work culture, the number of open offices increase and the demand for private spaces to think, focus, rest and make interviews or phone calls rises.

With sound isolation and fabric upholstered inner surface, Calma family designed as a compact solution to private phone calls, brainstorming sessions, videoconferences and teleconferences, telephone interviews, one-to-one and touchdown meetings or focused teamwork without leaving the workspace.

With Nurus Links[®] connection Calma also offers you to use your mobile devices and laptops.

Calma helps you in two ways: Reduces the noise in open-plan places and creates a comfortable, quite space to focus on important tasks.

With its sit-stand desk option, Calma provides flexible, mobile and energetic workplaces.
